

Maintenance procedures for Road Marking Equipment

To ensure that your road marking unit stays in optimal condition follow the below guides.

AFTER EVERY USE:

1. Clean all in-line high pressure filter cartridges
2. Clean suction filter at end of suction tube
3. Check if there is enough piston lube and add if necessary
4. Check engine oil level and top-up if necessary

MONTHLY OPERATOR MAINTENANCE TASKS:

1. Check tyre pressure on all wheels and make sure they are even
2. Remove and wash out foam insert of engine air filter
3. Grease all grease nipples
4. Set the correct tension on trigger cables
5. Check the level of wear on spraying tips
